

InstaMatch™

Version 1.0

Managing platelet refractory patients can be troublesome, time-consuming and costly. Finding appropriate blood products is essential to reduce a patient's risk of developing alloantibodies and to treat those who have become refractory.

Match every platelet every time

The InstaMatch web-based product matching and reservation software helps clinicians select the best-matched platelet product for a patient, based upon a grade and site-configurable compatibility score, and reserve it without logging into SafeTrace Tx®. An interface to a donor or transfusion management system¹ makes patient, donor and product information electronically available, automating the search and match process.

Unit ID	Product Code	Product Description	Grade	Score	Expiration Date/Time	Linked Patient MRN	Linked Patient Name	Antigens	ABO/Rh	Volume	CMV	Yield	Reserve/Cancel

InstaMatch calculates a grade and site-configurable degree-of-compatibility score using a patient's HLA-type, blood attributes and special needs – so clinicians can select and reserve the best-matched product every time.

¹ Blood Establishment Computer Systems (BECS)

Using the InstaMatch™ product matching and reservation software you can:

Automate searching and matching

- Electronically receive patient and product information from a donor or transfusion management system
- Search for products based upon antigen avoidance and blood attributes (ABO-Rh, CVM status)
- Enable a consistent approach patient-to-patient, clinician-to-clinician

Manage refractory patients and help reduce alloantibodies risk

- Calculate a grade and site-configurable degree-of-compatibility score
- Select and reserve the best-matched platelet product

Streamline record keeping and coordinate user access

- Maintain search, edit and configuration change audit history
- Limit and control access with different user roles

Reservation Confirmation

You are about to reserve Unit ID: **W123416111506**
For Patient MRN: **VAL002**
Current Product Status: **Product in available inventory**

Expected Transfusion Date:
10/07/2016 1:29 PM
(UTC-05:00) Eastern Time (US & Canada) ▼
