07/23/2001	O		1080	m21413	m21413	CHP	

Intuitive blood bank centric workflows powered by patented safety logic, enhance the user experience and help guard against mistakes.

## SafeTrace Tx<sup>®</sup> Transfusion Management Software System

Designed with blood banking expertise and the latest technologies and communication standards, the browser-based version of the SafeTrace Tx<sup>®</sup> Transfusion Management Software allows you to:

### Automate critical patient safety demands

- Leverage straightforward, easy-to-enforce patented safety and compatibility checks
- Access all patient details on one screen from the patented Patient-at-a-Glance Bar<sup>®</sup>
- Maintain complete patient testing and transfusion history for continuity of care
- Integrate with BloodTrack<sup>®</sup> Software for closed-loop transfusion safety

### Enhance clinical communications

- Seamlessly exchange data across the hospital network; including bedside transfusion systems
- Enable real-time care with effortless test result and status message sharing
- Receive transfusion administration data and process confirmation messages
- Leverage over a decade of experience interfacing with Allscripts<sup>®</sup>, Cerner<sup>®</sup>, Epic<sup>®</sup> and more

### Modernize the user experience and lower costs

- Securely access via a web-browser; no more “thick client” or need for Citrix<sup>®</sup>
- Automate specimen processing with one-step receipt and electronic order linking
- Capture and transmit billing transactions in real-time
- Simplify LDAP integration with embedded security and privacy auditing

Learn why the SafeTrace Tx is the transfusion management system-of-choice for hundreds of hospitals, including 5 of the top 10 hospitals in the US.\*

\*According to US News and World Reports Best Hospitals Honor Roll Ranking 2019-2020.
